

Simplifying Digital Plan Submissions for Municipalities and Contractors

CityView PlansDrop is a free, convenient way for municipalities to receive permit and development plans digitally from constituents and contractors—quickly and securely.

The challenge: delivering planning documents

Many municipalities offer only two ways to deliver planning documents:

- **Physical copies** - Many require multiple copies of printed plans. Not only is this costly for the applicant and cumbersome for the City, it's not environmentally friendly.
- **Email attachments** - Delivering digital plan sets by email is often unsuccessful as the files are too large for most mail servers. Not to mention, email is notoriously insecure.

Under these circumstances, maintaining business continuity for both municipalities and the customers they serve is a challenge.

The solution: CityView PlansDrop

CityView PlansDrop is a cloud-based solution that is exclusively offered to address these challenges.

- **Contractors** and applicants simply register with PlansDrop to deliver their plans electronically.
- **Municipalities** only need an internet connection to retrieve the files. Built-in security ensures proper access to the right files.

An elegant, simple solution that eliminates physical post boxes, file size issues and travel considerations, CityView PlansDrop also lets customers track all submissions in one place and allows municipalities to manage their online intakes for verification.

Benefits

CityView PlansDrop offers benefits to each party:

- **Contractors** receive assurance that files are received immediately and securely
- **Customers** can upload the files from their own offices and avoid numerous expenses in the process
- **Municipalities** receive the files electronically and improve their carbon footprint in the process

All this is offered and can be maintained without incurring any costs.

Best of all...

CityView's PlansDrop service is completely free for those that want to submit plans to the jurisdictions they do business with.

CityView offers the first 15GB of data storage at no charge to municipalities that subscribe.

A modest monthly fee applies if the data storage exceeds 15GB at any time during the calendar month.
